

2007-10-25 Developers Conference Call

<html><head><title></title></head><body>h1. Date

25 October 2007

In Attendance

- Paul Biondich
- Burke Mamlin
- Darius Jazayeri
- Justin Miranda
- Brian McKown
- Ben Wolfe
- Ada Yeung

Minutes

- Discussion of how to allow the core reporting service to know about and invoke reports from any location (e.g., modules). Darius will mock something up using extension point(s) and/or service functions
- Agreed on the convention of putting credentials (username/password) into runtime properties instead of settings (formerly global properties 1.8 and below) (i.e., OS instead of database) — see [#356](#)
- More discussion about how to handle commits to alpha and need for unit testing
- Some discussion of the [Good to Great conference](#)

Meeting Adjourned
