2015-06-15 Project Management Meeting

Date

15 Jun 2015

Attendees

- Jamie Thomas
- Émerson Hernandez
- Burke Mamlin
- Wyclif Luyima
- Darius Jazayeri
- David DeSimone
- Daniel Kayiwa

Discussion items

Item	Who	Notes
OCL subscription module	Rafal Korytkowski	Need to see where Rafal Korytkowski and Nicholas Ingosi are on moving this forward. Are there JIRA tickets they are working on?
Condition List	Émerson Hernandez	design forum today will be talking w/ Bahmni BA (Saranya) about use cases and requirements
OpenMRS Web Framework	Burke Mamlin	17 June will look at how to make REST services more robust
Vertical Packaging	Burke Mamlin	First step will be to add ability to map metadata, 22 June design forum
Administrative functions	Wyclif Luyima	will look at how to make REST services more robust on Wednesday's design forum and look at Bahmni's work later on
Support for MariaDB		- need to figure out how we want to proceed with getting CI set up - dev5's can help with CI when we identify specific tasks

Java 8 support	Wyclif Luyima	- older versions of OpenMRS failing if running Java 8 - Java 8 can run Java 6 code but can not build - need to send out a broad message to the community about the need to update systems to Java 8 so they can prepare for platform release later in the year - Wyclif would like to get some unit testing to make sure nothing is failing - will send a communication to the community encouraging them to update production machines to Java 8 after testing is complete
Upgrade Underlying Technologies	Rafal Korytkowski	discussed the state of a what a module owner needs to do on dev forum and need to document the situation on a wiki page - Rafal or Kris?
FHIR Support	Suranga Kasthurirathne	basing on 1.10 support for now
Remove Legacy UI	Burke Mamlin	- GSoC project - in master there is no UI anymore - need to discuss roadmap for platform changes 2.0 - dev forum discussion
Implementations	David DeSimone Émerson Hernandez	PIH - Ellen Ball is in West Africa doing check in for clinic in Liberia, also visiting Sierra Leone Bahmni - still working on relationships (separate clinical vs. personal) and gender (supporting other than M/F) - will be talking about condition list on today's design call - programs (setup programs like diabetes or TB and enroll patients) being built on top of OpenMRS existing code - still working on PACS integration features

Action items

- ☑ Jamie Thomas will follow with Rafal and Nicholas on where we stand on OCL subscription module.
- ☑ Burke Mamlin will create/revive a discussion on OpenMRS Talk around metadata mapping to help prepare for our design forum discussion on 22 June.
- ☐ Wyclif Luyima will send a communication to the community encouraging people to assist with unit testing so they can update production machines to Java 8
- ☑ Jamie Thomas will reach out to Rafal to coordinate the development of a wiki page around how module owners will need to work across hibernate.
- ☑ Jamie Thomas will work to schedule developers forum on "Do we need a 1.12 vs/or 2.0 for the platform?" (possibly this Thursday)
