

# 2009-11-04 Design Review

## Date

04 November 2009

## In Attendance

- Ben Wolfe
- Darius Jazayeri
- Mike Seaton
- Burke Mamlin
- Win Ribeka
- Judy Wawira
- Justin Miranda

## Agenda

- [archive:Person/Patient/User model needs adjusted \(#1506\)](#)

## Minutes

- Added comments to the [Design Reviews](#) Google Doc
- Darius's notes about to-dos
  - Change User from Voidable to Retireable
  - Person
    - isUser() should be deprecated and throw a descriptive APIException
  - User
    - needs person\_id added, which should default to user\_id for existing rows
    - add getPersonName(), getGivenName(), and getFamilyName() that delegate to Person, but no other methods.
    - add a constructor that takes all required parameters for User and Person
  - Patient
    - should probably add person\_id to Patient too, while doing this
  - UserService
    - add getUsers(Person) -> List<User>
