

Code Quality Leader

Ivo Ulrich

Description

The Code Quality Leader is responsible for ensuring OpenMRS Community-supported software is of high quality by promoting a culture of high quality coding practices within the community, and defining and improving processes & tooling to empower developers to produce high quality code.

Requirements

- Dedication to OpenMRS mission, vision, and values
- Strong development skills and experience in OpenMRS development, including Java and JavaScript
- Good communication skills and ability to work well with people of different cultures
- Enough available, dedicated time to fulfill responsibilities

Responsibilities

- Promoting a culture of producing high quality code within the OpenMRS Developer Community
- Ensuring community software undergoes code review
- Ensuring community-developed software is being assessed for quality (random sampling, using tools like SonarQube)
- Helping mentor and lead volunteers within the community who also wish to help with code quality
- Make the final decisions relating to code quality for the community
