

Attachments Module Enhancements

Primary mentor	Dimitri R
Backup mentor	Ivange Larry
Assigned to	N/A

Abstract

The Attachments module brings to the OpenMRS Reference Application a central place to view & manage file attachments. Additionally it encompasses files uploaded elsewhere within OpenMRS as long as they are saved as [complex obs](#).

The aim of this project is to get v2.0 of the module ready for release. This will consist of working on a [subset of tickets for the v2.0 release](#).

Project Champions

- [Dimitri R](#)
- [Romain Buisson](#)
- [Mark Goodrich](#)

Skills Needed

- Java & Javascript
- Experience working with RESTful Web Services

Objectives

1.  To be confirmed - the objectives for this project will be to complete a [subset of tickets for the v2.0 release](#).
2. Attachments to become 100% RESTful.
3. Attachments UI to be
 1. Segregated to an [Open Web App](#).
 2. Converted from Angular to React.
