

Paper forms for SCI ETC

Paper forms for the Kerry Town Ebola Treatment Centre run by Save the Children.

The "patient and work flow" file [[pptx](#), [pdf](#)] gives an overview. The other files are forms. They are:

1. Triage [[word](#), [pdf](#)] (info collected by a medic with partial PPE behind plexiglass with a laptop)
2. Assessment [[word](#), [pdf](#)] (info collected by doctor and/or nurse in full PPE probably using tablet)
3. Inpatient [[word](#), [pdf](#)] (collected in wards with full PPE and tablet)
4. Drug request form [[word](#), [pdf](#)] (sent from wards or assessment using PPE+tablet)
5. Lab request form [[word](#), [pdf](#)] (sent from wards or assessment using PPE+tablet)
6. Discharge/death form [[word](#), [pdf](#)] (from wards using PPE+tablet)
7. Exit form [[word](#), [pdf](#)] (in exit tent, no PPE, laptop or tablet, probably not medical staff)
8. Ward Assessment form [[word](#), [pdf](#)]: A combination of 1+2 for transfer patients who enter with confirmed cases of Ebola, and with a CIF (case investigation form) filled out from the holding centre that transferred them. For now, this is not being used because many patients arrive without CIFs.

Nov 5 update: Forms have been recently updated, and now are starting to be used. As we get feedback from clinicians, we expect further changes.
