

2007-08-30 Developers Conference Call

<html><head><title></title></head><body>h1. Date

30 August 2007

In Attendance

- Ben Wolfe
- Paul Biondich
- Burke Mamlin
- Justin Miranda
- Maros Cunderlik

Minutes

GSOC 2007

Summaries are due tomorrow for all students.

Other

Justin- I have somebody working on getting your patient summary formatted, so we can plug in information. So, if you want to create one of the data sets on the server somewhere or just let me know which data you think is necessary. Some discussion on this issue.

Meeting Adjourned

- Scoping of patient identifiers (Darius' proposal)
 - <tt>+ patient_identifier_type.assigned_location_type</tt> what type of location is allowed to assign this identifier — e.g., District, or Facility. This would be used to constrain the dropdown where you pick an identifier's assigning location.
 - <tt>+ patient_identifier_type.uniqueness_level</tt> global vs. assigning_location
 - <tt>+ location_type</tt> (new table)
