

# KenyaEMR Distribution Modules

## Distribution specific modules

These modules are unlikely to be reusable outside of the KenyaEMR distribution:

kenyaemr	Main "distribution module" of KenyaEMR
kenyadq	Contains the Data Quality app
KenyaEMRCharts	Contains procedures for creating and maintaining ETL tables used for reporting

## Potentially re-usable modules

These modules are not used outside of the KenyaEMR distribution, but could potentially be used by other projects:

kenyacore	General EMR content management
<a href="#">kenyaui</a>	UI library

## Community modules (maintained by KenyaEMR project)

<a href="#">metadatadeploy</a>	Metadata management for distributions
