

Platform Release Notes 1.11.0

On this page:

Introducing: OpenMRS Platform 1.11

When OpenMRS reached 2.0, we decided to allow the platform – application programmer interface (API) and web services – to develop and grow separately from the web application. As a result, we have named the API and web services "OpenMRS Platform" and will continue to call our web-based medical record system "OpenMRS".

- **OpenMRS** – this continues to refer to our web-based medical record system.
- **OpenMRS Platform** – going forward, this refers to the API and web services used under the hood. When the OpenMRS application has sufficiently replaced the legacy user interface components, the user interface components will be removed from the platform and released as a separate module.

For the time being, we are in an awkward phase, where the legacy UI remains within the OpenMRS Platform and the new OpenMRS UI has not fully replaced the legacy UI. As a result, many implementations will continue to use the platform without the new web application and people will continue to be confused by the naming of "OpenMRS Platform". We are working hard to resolve this by OpenMRS 2.2 (or, worse case, OpenMRS 2.3), when implementations will be able to upgrade into the new application and the legacy UI can be retired from the platform.

This release is the "OpenMRS Platform 1.11" – it is the release version of the under-the-hood OpenMRS API that follows the OpenMRS 1.10.x line.

We hope also seeing this same platform in 2.2

Release date: Wednesday, 11 February 2015

Release Manager: [Kaweesi Joseph](#).

What's new in OpenMRS Platform 1.11.0 ?

OpenMRS Platform 1.11.0 is shipped with 11 bug fixes, 1 new features among other issues mentioned already in both the [Platform 1.11.0-Alpha](#) and [Platform 1.11.0-Beta](#) release notes, 1.11.0 has improved all bugs reported in those two prior releases and added one new feature as you can see below:

In short for all those who had not tried out the beta or alpha releases and would upgrade from 1.9.x or 1.10.x,

This release has in it a whole package of at-least **210 bug fixes**, **76 new features**, **24 tasks**, **27 sub-tasks** and **53 Database changes** plus 9 changes module developers wouldn't want to miss, please visit the 1.11.0-Alpha and 1.11.0-Beta Release notes to see all these contributions 🍌

Bug Fixes From 1.11.0-Beta:

Key	Summary	Status	Resolution
TRUNK-4605	OrderEntryIntegrationTest fails due to timing of discontinued order	CLOSED	Fixed
TRUNK-4576	Concept Dictionary CSV download - looping issue causes incorrect output	CLOSED	Fixed
TRUNK-4569	Calculated autoexpire date should be one second earlier	CLOSED	Fixed
TRUNK-4534	The scripts on the long patient form get broken if a patient has more than 10 identifiers	CLOSED	Fixed
TRUNK-4531	Encounter Provider Names not shown for providers not linked to a person on patient dashboard visits tab	CLOSED	Fixed
TRUNK-4509	Cannot edit concept description to empty	CLOSED	Fixed
TRUNK-4490	EncounterValidator should validate presence of encounter type	CLOSED	Fixed
TRUNK-4482	Voided encounters shows in the current visit in patient header	CLOSED	Fixed
TRUNK-4301	Including voided patients in openmrs 1.11.x	CLOSED	Fixed
TRUNK-4208	Gender and Birth date should not be required for persons linked to providers or users	CLOSED	Fixed
TRUNK-3937	Stored XSS in Location Pages	CLOSED	Fixed

11 issues

New Feature from 1.11.0-Beta:

 [TRUNK-3963](#) - Visit validator should prevent or allow overlapping of visits depending on global property CLOSED

Bundled Module:

This module is bundled with OpenMRS 1.11.0. It will be started automatically and can be removed if desired.

Bundled Module	Version
Rest Web Services	2.9.39bd19

MVP Dictionary:

Download

Download OpenMRS 1.11.0

- OpenMRS 1.11.0 represents revision: 5d5d298a2e5794c0de26f76ba930c59b18b3349c.
- [Download OpenMRS 1.11.0 from Sourceforge.net.](#)
- Directly [download war file alone.](#)
- Directly [download the standalone](#)
- [Other download options are listed on OpenMRS.org.](#)

Installation

- Unzip the downloaded OpenMRS Platform 1.11.0 zip file. (For linux users; this needs to be in an ext file system type, most partitions created with and having windows formats will not work since the installation needs to change file permissions which ubuntu allows for only **ext** file systems - TODO add reference)
- Change directory into the openmrs-standalone-1.11.0 folder and then run the standalone using the **java -jar openmrs-standalone.jar** command.
- The openmrs standalone window will show up and you can proceed from there.
- The installation provide you three options but most the times you will use either the demonstration or fresh installation (comes with the above mentioned concept dictionary).

Upgrading

Consider using our [upgrading guide](#). In summary for Standalone 1.9.x or any other upgrade to 1.11.0, follow this guide:

- Back up your database to be on the safe side in-case something goes wrong, use either the [Database Backup Module](#) or refer to the [MySQL Backup](#) guide.
- Stop all the Modules and logout of openmrs if possible.
- Close the openmrs standalone window
- Download the OpenMRS Platform 1.11.0 from [sourceforge](#) and replace the war file in your previous standalone located under **tomcat/webapps** folder (also delete the openmrs-standalone folder) with the newly downloaded war file.
- Now re-run the standalone again, you will go through the database upgrade process (maintenance mode) by signing in as an administrator when prompted.
- We have tested upgrading from 1.9.7, 1.9.8, 1.10.0 and 1.10.1 to 1.11.0 and all those upgrades were successful. So have no worries

That should be enough to get you to this powerful OpenMRS Platform 1.11.0. Enjoy 🍌 .

Contributors

From 1.11.0-Beta

A huge thanks to all our wonderful contributors, the [soldevelo team](#), [Unknown User \(kristopherschmidt\)](#), [Unknown User \(tharunya\)](#), [Unknown User \(jkondrat\)](#), [Jakub Buczynski](#), [Pawe Muchowski](#), [Unknown User \(chocobar\)](#), [Unknown User \(vinay\)](#) and [Daniel Kayiwa](#).

All Contributors:

Thanks to you all that have made 1.11.0 a success, a total of at-least 130 committed wonderful people are those whom we have worked with to get 1.11.0 out and released to the whole community, Here are they by their names:

Ak, [Akash Agrawal](#), akub Kondrat, [Alec Pawling](#), [Alberto Saavedra](#), andreapat, Andrew Szell, aniketha, anotherdave, Areo, Arkadiusz Kolodziejcki, atmohsin, [Ben Wolfe](#), [Bhashitha Wijewardhane](#), blobbered, [Burke Mamlin](#), Carlos Augusto de, Oliveira, chalakanth, channab, Chelsea H. Komlo, citigodev1, Crazzykid, Damian Szafranek, damithakithmal, [Daniel Kayiwa](#), [Darius Jazayeri](#), David Churcher, David Elston, Dedunu Dhananjaya, devcritter, dkithmal, Dominic Lynch, Dominic Surrao, [Zhaslan Doschanov](#), [Filip Biedrzycki](#), [Filip Spiridonov](#), Fouad Zaryouh, [Garima Ahuja](#), [Gaurav Paliwal](#), Gaurav Saini, [Geoffrey Wasilwa](#), geoff-wasilwa, gto11520, guilhermejccavalcanti, Gurpreet Luthra, h3llborn, [Hannah Massey](#), [Harsha Kumara](#), haychris, Isha Tripathi, Jakub Buczynski, [Jakub Kondrat](#), [James Arbaugh](#), Janet Riley, Jasper Vandemalle, Jeffrey Kantor, [Jeremy Keiper](#), Jesus Salazar, Kishore Kumar Yekkanti, [Kaweesi Joseph](#), kohousim, [Unknown User \(kristopherschmidt\)](#), Krzysztof Kaczmarczyk, kushal8, lc-daderemi, Lech Rozanski, [Lee Breisacher](#), Lisha Ruan, [Luis Martinez](#), [Lukas Breitwieser](#), Lukasz Plotnicki, Nithya Gubbala, madawa-rc, Marek Szukalski, [Mark Goodrich](#), Marv Cool, Marvin Yan, [Matthew Ssemakadde](#), [Michael Downey](#), Michael Pigg, Michael Seaton, Mykola Vorobey, mylesbarros, Nils Eckelt, nrubeka, Oliver Wilkie, Ozge Catalbas, [Pawe Muchowski](#), Patrick Turley [pturley], Priya Chandran, Przemyslaw Gierszewski, Pulkit, pushkar, Radek Puzdrowski, Radoslaw Puzdrowski, [Rafa Korytkowski](#), Rob, Robert Day, rohitmukherjee, [Rowan Seymour](#), sachethgupta, [Saptarshi Purkayastha](#), [Sara Fatima](#), sashrika, SharonVarghese, shruthidirepresents revisionpali, ShubhamRai, sitarama, suranga, SusanTan, tadeitto, tonybeing, Tharunya Pati, [Ujjwal Arora](#), vaibhav-hp, Vatsal Singhal, vencik, [Vinay Venu](#), [Vinkesh Banka](#), [Wesley Brown](#), Wolf Schlegel, [Wyclif Luyima](#), Yekkanti Kishore Kumar.

Not forgetting all the people that contributed in countless other ways to support and be a great part of the shaping of this release: We are very sensitive not to hurt your emotions and in-case you are one of such please email us and we shall be able to mention you by name

End Of Life (EOL) announcement

OpenMRS 1.8 is no longer supported

As of described in [Unsupported Releases \(EOL\)](#), OpenMRS can only support up to three released versions at a time (the current release and then two versions back). Since OpenMRS Platform 1.11 is only the second release of the OpenMRS Platform (following OpenMRS 1.10), there are no earlier versions of the platform undergoing EOL.
