

# 2008-09-18 Developers Conference Call

## Date

18 September 2008

## In Attendance

- Justin Miranda
- Mike Seaton
- Burke Mamlin
- Ben Wolfe
- Brian McKown
- Darius Jazayeri
- <!--
- Sam Ndichu
- Andreas Kollegger
- Saptarshi Purkayastha
- >

## Agenda

- Review decisions from [last week](#)
- Starting a road map
  - Decide on Trac vs. the [wiki](#)
  - Prioritization process (at least to get started)
- New website(s) update
- GSoC Mentor Summit

## Minutes

- Justin update re: new trac site
  - testing on svn2
  - making smooth transition from current trac to new trac
  - subversion should not have ssl; trac needs ssl as long as we use new trac as we do now
- Roadmap
  1. Define timeline explicitly.
  2. Schedule code reviews on regular basis.
  3. Burke will make straw man road map.
  4. Ben will lead code review process.
    - Hour or whatever it takes per week for code review
    - 3 constant code review people.
- Mentor Summit
  - Proposed two people to send:
    - Ben
    - Mike
- Mark Bencotter helping with OpenMRS mentorship.
  - Organizing Developers.
  - Making the most of all internship opportunities.
  - CC mark on all/any internship correspondence.
- Planning a Software Development Class backed by OpenMRS.
  - Implementation specific module for one (or two) implementer(s).
  - Develop something closer to products than programs.
  - Prefer aim low and hit goal than aim high and miss goal.
  - Use concrete specifications from OpenMRS developer and/or implementor(s).
  - Project Ideas:
    - PMTCT
    - Reverse Chronological View of Patient data.
- Tagging 20+ tickets as "My first OpenMRS ticket." - See new trac report: <http://dev.openmrs.org/report/20>

Moving tests from `test.api.org.openmrs.test` to `test.api.org.openmrs.*`

- Burke's one more thing that Brian hung up on before he could say it:
  - Need to do Logic-a-thon in late October or mid-november (before Thanksgiving).
