

Platform Release Notes 1.11.9

Release Date: Monday March 2nd, 2018

This version of the OpenMRS Platform is not intended for use by implementations running reference application other than OpenMRS 2.2 and above, because it has several incompatible changes that will break some modules.

Thanks [Unknown User \(mogoodrich\)](#), [Unknown User \(henziger\)](#), [Unknown User \(owais\)](#), [Daniel Kayiwa](#) and [Dimitri R](#) for these fixes.

What's New

This release is "OpenMRS Platform 1.11.9" and is a maintenance release version of the under-the-hood OpenMRS API that follows 1.11.8.

For the time being, we are in an awkward phase, where the legacy UI remains within the OpenMRS Platform and the new OpenMRS UI has not fully replaced the legacy UI. As a result, many implementations will continue to use the platform without the new web application and people will continue to be confused by the naming of "OpenMRS Platform". We are working hard to resolve this by OpenMRS 2.4, when implementations will be able to upgrade into the new application and the legacy UI can be retired from the platform.

To upgrade from a pre 1.10 version, you will certainly need to read [Prepare for Upgrading From a Pre-1.10 to 1.10 or Later Version](#)

Bug Fixes

Key	Summary	T	Created	Updated	Due	Assignee	Reporter	P	Status	Resolution
TRUN K-5359	Syntax error in HibernatePersonDAO search query		2018-02-20	2018-02-28		Owais Hussain [X]	Owais Hussain [X]		CLOSED	Fixed
TRUN K-5302	HibernatePatientDAO getPatients(String,Integer,Integer) only returns single identifier when matching by patient identifier		2018-01-04	2018-01-05		Unassigned	Mark Goodrich		CLOSED	Duplicate
TRUN K-5210	OrderServiceTest failure		2017-08-18	2017-08-19		Daniel Kayiwa	Daniel Kayiwa		CLOSED	Fixed
TRUN K-5185	Add unique index to uuid column in concept_reference_map and concept_reference_source tables		2017-07-06	2017-12-04		Mark Goodrich	Mark Goodrich		CLOSED	Fixed

Tasks

Key	Summary	T	Created	Updated	Due	Assignee	Reporter	P	Status	Resolution
TRUNK -5264	Add HAPI libraries for HL7 v2.3 and v2.4 support		2017-12-22	2018-12-13		Mark Goodrich	Mark Goodrich		CLOSED	Fixed

TRUNK -5213	Load Spring resources conditionally based on missing module(s)		2017-09-01	2017-09-26	Dimitri R	Dimitri R		CLOSED	Fixed
TRUNK -5161	Add getIsPatient accessor to 1.10.x, 1.11.x, and 1.12.x lines		2017-05-05	2017-05-05	Mark Goodrich	Mark Goodrich		CLOSED	Fixed
TRUNK -5123	getConceptByName should immediately return concept if only one matching concept		2017-03-22	2018-04-05	Eric Henziger	Mark Goodrich		CLOSED	Fixed

4 issues

Database Changes

None

Who is this release meant for?

- Anyone running OpenMRS Platform
- Anyone running OpenMRS Reference Application 2.2, 2.3 and 2.4

If you are running serialization.xstream or metadata sharing or reporting module, they expose some security risks too, so you're strongly recommended to upgrade them to the versions below:

[Serialization.xstream 0.2.10](#) or later

[Metadata sharing 1.1.10](#) or later

[Reporting 0.9.8.1](#) or later

Community Input

A huge thanks to the people that contributed code to this release, not to mention all the people that contributed in countless other ways to support this release and be a great part of the shaping it and the whole infrastructure team!

We welcome any user to download OpenMRS 1.11.9 and try it out, give us feedback.

If you to run into any bugs, send a message via [talk](#) or [create a new JIRA ticket](#) (click upper right icon).
