

Core Release Notes 2.1.1

Note: This platform release requires Java 1.8 and above.

Release Date: 29 Oct 2017

This is not a full release of the OpenMRS Platform, and it will not get Long Term support. It is intended for production use, but only if you are a developer who wants to always use a cutting-edge release of openmrs-core.

What's New

OpenMRS Core 2.1.1 is a maintenance release that fixes several bugs from Core 2.1.0. There are no database changes when upgrading from 2.1.0 to this version.

Thanks [Unknown User \(angshuonline\)](#), [Daniel Kayiwa](#), [Dimitri R](#), [Shruthi Pitta](#), and [Unknown User \(jaks80\)](#) for these fixes.

Bug Fixes

Key	Summary	T	Created	Updated	Due	Assignee	Reporter	P	Status	Resolution
TRUN K-5224	After saving Order Group order_group_id foreign key is Null in orders table		2017-10-16	2017-10-26		Yusuf Akhond [X]	Yusuf Akhond [X]		CLOSED	Fixed
