

# 2005-12-15 Developers Conference Call

<html><head><title></title></head><body>Attending: Hamish, Paul, Burke, Ben, Vibha, Justin, Darius, Neal

- Accessing Spring beans — e.g., "org.openmrs.api.context.Context.getBean(String beanName)'
- Thread-safety Context generation — e.g., *synchronized ContextFactory.createInstance()*
- Discuss Justin's event auditing system
- To what degree to use the Spring Framework
- Decision Support
- Coordinating efforts (best use of resources) — *Paul, Hamish, and Burke to discuss*

TODO:

- Vibha will start the conversation about decision support services with some suggested methods that she would need
- Hamish, Paul, and Burke will discuss the *big picture* to coordinate efforts among teams
- Justin will explore the [Spring Framework](#) as a potential framework for transaction handline and event processing. Did somebody say *Access Oriented Programming?*

:o)
