### Minutes

- Status of IRS Responses
  - Hamish has not heard anything from the lawyer
  - Current deadline is May 22nd
  - Hamish will email the lawyer today to see if they need anything else
- Status of Doc Sprint
  - Open Health Conference in Cincinnati in mid-June
  - Have not talked about reviving the doc sprint
  - 5 day event (2 about documentation, 3 doc sprint on projects running in parallel)
  - No one really owning the documentation space
- OMRS13
  - Continuing weekly meetings with the Kenay team
  - Putting together registration packet and coming up with sponsorship outreach
  - Putting together volunteer roles and responsibilities
  - Did a soft launch of the registration process, early bird registration until the end of July
  - Any movement with HELINA group? Want to have some overlap with the conference.
  - Working with local transportation in Eldoret to help accommodate our large group working to communicate with airlines
  - Joint fundraising? Working on who will be responsible for approaching different sponsors and organizations locally and internationally
  - Announcement for OMRS14? We will call for proposals in June.
  - Burke thinks that it would be nice for next year to try and work towards incorporating tutorials.
  - Local attendees? There will be consideration for special local attendees to give keynote talks.
  - Should we make spaces for planned sessions? Is it necessary to set time aside because people will ask for sessions that they are interested in.
  - The last few years we have done a mixture of "structure and unstructure" which people seem to appreciate
- Community Road Map

- <https://wiki.openmrs.org/display/projects/Community+Road+Map>
- Q2 ends June30th
- Not alot of inspiration out there, would like to have eveyone looking that burning areas of need
- Document too detailed?
- Format might be fine but content unrealistic
- It should reflect our goals for 2013 and be honest about what can happen over the next 3, 6, or 12 mths.
- Would like to see it written for more of a customer not a developer
- Burke will work on simplifying
- Leads Discussion Schedule
  - <https://wiki.openmrs.org/display/RES/Leads+Discussion+Schedule>
  - Would like to see Paul added to the schedule
- IMO
  - CIEL dictionary that is IMO coded
  - Server is rather large to run multiple tools
