

Inventory Module 1.4 Release Notes

Bug

- [inv-115](#) — Stockroom Page Transaction List Performance
- [inv-116](#) — Stockroom Operation List Performance
- [inv-117](#) — Stockroom Detail List Display Issues
- [inv-167](#) — Exception When Creating Operation with Expirable Stock without Expiration
- [inv-171](#) — Batch and Expiration Should Appear on Operation Item Lists
- [inv-173](#) — Extra Transactions Created When Fulfilling Operation with Negative Source Stock
- [inv-174](#) — Incorrect Item Stock Details when Adding to Existing Negative Item Stock
- [inv-175](#) — ObjectDeletedException when Negative Item Stock Detail is Deleted by Operation
- [inv-176](#) — Operation Type Not Limited to User on Operation Create Page
- [inv-177](#) — Operation Type Attributes Missing on Operation Creation Page
- [inv-178](#) — Inventory Reports page empty when forgetting to configure reports in inventory settings
- [inv-181](#) — Table columns too small (view operation/stockroom details etc)
- [inv-182](#) — Added items are not considered when creating operation
- [inv-183](#) — Set default search status for operations depending on AutoCompleteOperations property
- [inv-192](#) — Quantity field too small to display 4 digit numbers
- [inv-207](#) — NullPointerException when Reapplying Operations

Feature

- [inv-158](#) — Add the ability to Roll Back a Closed Operation
- [inv-184](#) — Show 'None' Expiration When Expirable Stock with No Expiration Exists
- [inv-189](#) — Restrict Ability to Submit an Operation Multiple Times
- [inv-194](#) — Provide item expiry report on inventory reports page so that pharmacists can run it

Usability Problem

- [inv-138](#) — Properly Handle Changes to Item Expiration
