

Inventory Module 1.1 Release Notes

Bug

- [inv-87](#) — Error message for purging items without rights is misleading
- [inv-99](#) — Fix Hibernate Class Loader Issue
- [inv-127](#) — Status Column Title Missing on View Stock Operations Page
- [inv-130](#) — Inventory Module causes OpenMRS to be unable to load any other module
- [inv-131](#) — "select all" does not save itemConceptSuggestions
- [inv-132](#) — Rest Web Services 2.6.9d2016 causes pagination to not work properly
- [inv-133](#) — Operation Items Not Displayed
- [inv-134](#) — Adding an operation on the inventory page does not close section if one decides to edit an operation instead
- [inv-135](#) — Idgen Module is Optional but Settings and New Op Break if Not Loaded
- [inv-137](#) — Same price values on items cause problems when selecting a default price
- [inv-143](#) — patient once set cannot be set to "null" in operations that require patient or institution
- [inv-144](#) — NoSuchElementException when trying to create an operation
- [inv-145](#) — form not submittable once "An operation must contain at least one item" occurs

Feature

- [inv-129](#) — Support Patient Recipients in New Operations

Task

- [inv-79](#) — cleaning up tests

Usability Problem

- [inv-83](#) — Hide add Item Link when opening edit item form
- [inv-85](#) — Provide better error messages when trying to purge an item
- [inv-113](#) — Provide better error message when deleting an item used in a bill
