

Inventory Module 1.5 Release Notes

Bug

- [inv-166](#) — Transfer from and to the same stockroom should no longer be possible
- [inv-195](#) — Stock Card report incorrect
- [inv-211](#) — Do Not Allow Item Stock Expirations in the Past
- [inv-213](#) — Exception when Processing Operations with Very Distant Expirations
- [inv-214](#) — Item Stock Detail Records with Time Portion are being Created
- [inv-215](#) — The inv_item_stock_detail table expiration column is datetime but should be only date
- [inv-218](#) — Order operations in (Stock Card) Reports by Operation Date
- [inv-219](#) — Rollback not possible after creating operations
- [inv-220](#) — Expiration date "none" with negative stock leads to problems with operations in the past
- [inv-221](#) — NPE when trying to resubmit an operation after a js error
- [inv-232](#) — NPE Error creating operation

Feature

- [inv-63](#) — Confirm deleting prices/codes when editing/adding items
- [inv-96](#) — Add a Canceled Reason to Operations
- [inv-152](#) — Create UI for Item Attributes
- [inv-185](#) — Add Operation Type Search to View Stock Operation Page
- [inv-186](#) — Add Item Search to View Stock Operation Page
- [inv-188](#) — Support Displaying Item Stock Details on Stockroom Page
- [inv-205](#) — Create Basic Item Attributes
- [inv-210](#) — Add Stockroom to Expiring Item Report
- [inv-212](#) — Add search by name to stockroom items list
- [inv-234](#) — Source stockroom change should reset items
- [inv-235](#) — Disable item selection unless source stockroom is selected
