2016-01-04 Project Management Meeting

Date

04 Jan 2016

Attendees

- Jamie Thomas
- Darius Jazayeri
- Mayank Sharma
- Wyclif Luyima
- Daniel Kayiwa
- Theresa Cullen

Goals

- Get caught up on where things are after the holiday break

Discussion items

Item	Who	Notes
Community Development Status	Darius	- Darius will start posting more publicly about getting formal on recording things that happen in the community so we can create metrics and give people feedback - All should label appropriate tickets as "community priority"
Platform 1.12	Shruthi Dipali	- showcase on 11 Jan design call - UI put on hold for awhile
Platform 2.0	Mayank	- alpha out in next 2 days - have drafted helpdesk, blog and talk communications - locally testing modules that need to be bundled - legacy UI should be in test - will work on updating REST web services after releasing Platform 2.0 alpha. - need legacy UI release before alpha - decided on the REST resource approach, and will work on this after the alpha - next version 2.0 alpha then 2.0 beta - outstanding 2.0 platform tickets, 10-12 tickets will be released with alpha and then other released with beta - tickets with design tickets need to be design forum topics - need new organized process for servers - priority is for automated builds to go into platform then deal with QA platform - Darius recommends that the integration and QA servers are only what actual release is (UAT server needs legacy UI) - finalize a way to transition reference application to run on 2.0, alpha release will re-kindle conversation
Other		- Would like to see other topics on this call, not just dev and tech - How are you planning to track activity Darius? Propose new database for GitHub, Talk, Wiki. - ThoughtWorks devs in India are planning to work on Atlas Module (dev forum topic) - Elliott Williams to show dev on module repository

Action items

- ☐ Darius Jazayeri will start posting more publicly about getting formal on recording things that happen in the community so we can create metrics and give people feedback
- ☐ Mayank Sharma will be releasing Platform 2.0 alpha release in 2 days
- ☐ Rafal Korytkowski will do a release of REST web services with no new features before the Platform 2.0 Alpha
- ☐ Wyclif Luyima will release legacy UI module imminently in advance of the Platform 2.0-alpha release.
- ☑ Mayank Sharma will work to get 2.0 outstanding design tickets on upcoming design calls (work with Jamie Thomas), can post on Talk w/ "design-forum" tag

- [ ] Mayank Sharma will talk with the infrastructure team about organization of servers
- [x] Mayank Sharma will share blog and talk posts with people privately to get feedback
- [ ] Darius Jazayeri will reach out to Elliott Williams to show dev on module repository.
