

Platform Release Notes 1.10.4

Release Date: Monday Feb 8th 2016

This version of the OpenMRS Platform is not intended for use by implementations running reference application other than OpenMRS 2.1, because it has several incompatible changes that will break some modules.

What's New

This release is "OpenMRS Platform 1.10.4" and is a maintenance release version of the under-the-hood OpenMRS API that follows 1.10.3.

For the time being, we are in an awkward phase, where the legacy UI remains within the OpenMRS Platform and the new OpenMRS UI has not fully replaced the legacy UI. As a result, many implementations will continue to use the platform without the new web application and people will continue to be confused by the naming of "OpenMRS Platform". We are working hard to resolve this by OpenMRS 2.3, when implementations will be able to upgrade into the new application and the legacy UI can be retired from the platform.

To upgrade from a pre 1.10 version, you will certainly need to read [Prepare for Upgrading From a Pre-1.10 to 1.10 or Later Version](#)

Database Changes

- Adding birthtime column to person - [TRUNK-4727](#)
- Add an index to the global_property.property column - [TRUNK-4743](#)
- Add an index to the concept_class.name column - [TRUNK-4743](#)
- Add an index to the concept_datatype.name column - [TRUNK-4743](#)
- Set uuid columns to "NOT NULL", if not set already for 1.9.x tables - [TRUNK-3915](#) (note that running this changeset against large tables like the obs table could be time and processor intensive, [see this Talk Thread](#).)

Bug Fixes

Key	Summary	Assignee	Reporter
TRUNK-4775	Upgrading to 1.10.3 will fail	Unassigned	Saptarshi Purkayastha
TRUNK-4487	Module architecture fails to populate aware_of modules in ModuleClassLoader if they start in the wrong order	Lluis Martinez	Darius Jazayeri
TRUNK-4748	MessageSources should not be transactional	Daniel Kayiwa	Wyclif Luyima
TRUNK-4743	Create missing database indexes	Stefan Neuhaus	Rafal Korytkowski
TRUNK-4726	auto_update_database=true would not apply liquibase changesets	Rafal Korytkowski	mario s
TRUNK-4811	Daemon user must be cached	Rafal Korytkowski	Rafal Korytkowski
TRUNK-4810	isDatabaseStringComparisonCaseSensitive must be cached	Rafal Korytkowski	Rafal Korytkowski

TRUNK-4779	Cache reflection info for calls in RequiredDataAdvice	Rafal Korytkowski	Rafal Korytkowski
TRUNK-4771	Authorization checks are slow when running as Daemon	Rafal Korytkowski	Rafal Korytkowski
TRUNK-4635	Cancel button doesn't allow to exit Creating New Concept Page	Aashna Garg	Ada Yeung
TRUNK-3383	HandlerUtil.getPreferredHandler(Class<H> handlerType, Class<T> type) throws an exception if top-ranked handlers have the same order ranking	Rafal Korytkowski	Mark Goodrich
TRUNK-4763	List<ConceptSearchResult> getConcepts(String phrase... can return the same concept twice	Mark Goodrich	Mark Goodrich
TRUNK-4721	Performance issue with version of H2 that we are using	Mark Goodrich	Mark Goodrich
TRUNK-4793	obsValueField.tag has an invalid jstl expression	Mike Seaton	Mike Seaton
TRUNK-3580	MessageSourceService.getMessage methods that take a MessageSourceResolvable should return the proper default message	Shekharreddy Mittapelly	Darius Jazayeri
TRUNK-4471	The first time I try to save a concept it gives a spurious error about concept map type is required	Vishnu Mechineni	Angshuman Sarkar

Who is this release meant for?

Implementations that are running OpenMRS 2.1 or implementations that are running plain OpenMRS Platform 1.10.x.

Community Input

A huge thanks to the people that contributed code to this release, not to mention all the people that contributed in countless other ways to support this release and be a great part of the shaping it including Burke Mamlin, Daniel Kayiwa, Wyclif Luyima and the whole infrastructure team!

We welcome any user to download OpenMRS 1.10.4 and try it out, give us feedback, and potentially bug reports on this release.

If you happen to run into any sort of obscure bugs, send a message via [talk](#) or [create a new JIRA ticket](#).
