

# Inventory Module 2.4.0 Release Notes

## Bug

---

- [inv-538](#) — Make the quantity field wider in the create inventory operation 2.x page
- [inv-539](#) — Allow use of a datepicker when creating an initial operation on an item with an expiration
- [inv-540](#) — Return operation fails when patient is selected
- [inv-542](#) — Fix privilege to view a stock operation
- [inv-545](#) — Inventory settings privilege not added then creating an Inventory Role
- [inv-546](#) — The setting page privilege in the Inventory Json page is defined wrongly
- [inv-547](#) — Create Operations: Cannot Save Operations that create non-expirable stock
- [inv-548](#) — Fix Search on Manage Stockrooms page
- [inv-549](#) — Create Operation: Cannot Save New Operation Date if there are No Other Operations on Selected Date
- [inv-566](#) — Create Operation: Exception when saving operation
- [inv-571](#) — Create Inventory Operation: Existing Stock Quantity is incorrect
- [inv-572](#) — Cancel button doesn't work on the Create Inventory Operation 2.x page
- [inv-573](#) — Select quantity field text in the line item when creating an operation
- [inv-574](#) — Add a 'Create Operation' button on the View Stock Operations Page
- [inv-578](#) — Create Operation - Receipt Doesn't save if some items don't have expiration

## Cosmetics

---

- [inv-569](#) — Create Operation: Quantities larger than 2 digits get Cut Off

## Usability Problem

---

- [inv-550](#) — Reorder Inventory Task Dashboard Buttons
- [inv-551](#) — Create Operation: Existing Stockroom Qty Should not be Visible when there is no Source Stockroom
- [inv-552](#) — Create Operation: No Qty Warnings should be display when there is no Source Stockroom
- [inv-557](#) — Create Operation: Trying to Delete the Quantity Results in Error
- [inv-560](#) — Stock Take: Entering an Actual Qty field and leaving it blank results in Error
