

openmrs-esm-home

What is this?

openmrs-esm-home is an [in-browser javascript module](#) that is a [single-spa application](#). It is responsible for rendering the UI for the landing page after the user logs in.

How do I use it?

openmrs-esm-home is registered as a [core application](#) inside of openmrs-esm-root-config. This means that it will automatically activate whenever you are on one of the frontend routes that it controls.
