

Using the Legacy UI

The pages in this section contain instructions detailing how to complete some basic tasks within OpenMRS using the Legacy UI. This guide is meant to act as a basic end user guide to walk new users through some of the frequently used features of OpenMRS. If you are using OpenMRS version 2.0 or later, the equivalent instructions to the pages contained within this section can be found under [Using the Reference Application](#).

Below is a table of contents for this section.
