

Concept Proposal Module 1.0

About

When to use this module

The Concept Proposal Module (CPM) is for OpenMRS users that have created 1 or more new concepts in their local install of the concept dictionary, and believe that others would find it useful.

This module allows the user to submit their concept/s for review by the central dictionary administrator (Andrew Kanter at time of writing). If the administrator thinks the proposed concept/s are in fact useful and new, they can merge them into the central MVP-CIEL Concept Dictionary (recommended option).

The CPM also allows a user to send their new concept/s directly to another user, for example if they think only a few people would benefit from it. This option is not recommended, but there are instructions for doing that down the bottom of this page.

Installation

The CPM module is actually made up of two modules - Proposal and reviewer.

To submit concept/s for review: install the Proposal module.

To review concepts: install the Proposal and Review modules.

Use

Submitting a concept proposal

These instructions assume that you have already created 1 or more concepts in your local dictionary.

The screenshot shows the OpenMRS Administration interface. The browser address bar displays the URL: `ec2-54-245-1-154.us-west-2.compute.amazonaws.com:8080/openmrs/admin/index.htm`. The user is logged in as Super User. The navigation menu includes: Home, Find/Create Patient, Dictionary, and Administration. The main content area is titled "Administration" and lists various management options:

- Users**
 - Manage Users
 - Manage Roles
 - Manage Privileges
 - Manage Alerts

g

Name	Synonyms	Description
<input checked="" type="checkbox"/> GASTROESOPHAGEAL REFLUX DISEASE	ACIDITY, GERD, GER	A chronic condition in which the lower esophageal sphincter allows gastric acids to reflux into the esophagus, causing heartburn, acid indigestion, and possible injury to the esophageal lining.
<input type="checkbox"/> GASTRIC ULCER	ULCER GASTRIC, GUD	Peptic ulcer in the lining of the stomach.
<input type="checkbox"/> SERUM GLUCOSE	GLUCOSE, BLOOD SUGAR, GLU	Laboratory measurement of the glucose level in the blood.
<input type="checkbox"/> GRAM NEGATIVE RODS	GNRs, GRAM -VE RODS	Rod-shaped bacteria staining red with Gram's stain.
<input type="checkbox"/> GASTROESOPHAGEAL REFLUX DISEASE	ACIDITY, GERD, GER	A chronic condition in which the lower esophageal sphincter allows gastric acids to reflux into the esophagus, causing heartburn, acid indigestion, and possible injury to the esophageal lining.
<input type="checkbox"/> GRAM POSITIVE RODS	GPRS, GRAM +VE RODS	Rod-shaped bacteria staining purple with Gram's stain.
<input type="checkbox"/> GOITER	THYROMEGALY, STRUMA	A noncancerous enlargement of the thyroid gland, visible as a swelling at the front of the neck, that is often associated with iodine deficiency.
<input type="checkbox"/> GRAVIDA	TIMES PREGNANT	The number of times a woman has been pregnant
<input type="checkbox"/> SERUM GLUCOSE	GLUCOSE, BLOOD SUGAR, GLU	Laboratory measurement of the glucose level in the blood.

Add Cancel

Add the concepts you have created.

Description field: it is useful to include why you created these concepts, and when and how to use them. Also include information about any dependencies, including on concepts already in the dictionary. If you have questions or thoughts about how these fit into existing or new workflows, add those too. Basically, add anything you think the dictionary manager might want to know.

At this stage you can either: cancel, which will lose your work; save your draft to edit later; or submit.

If you save or submit, you will be able to see the status of your proposal under the 'Monitor proposal' tab - the latest proposal is down the bottom.

<screenshot>

Once you've clicked 'Submit', your proposal is sent to the dictionary manager for review. The status of your proposal will change once the reviewer has examined it. Unfortunately, as the proposer, you will not be notified when your proposal status has changed - please just keep checking when convenient.

The CPM allows the proposer and reviewer to maintain a conversation via comments within the CPM.

Reviewing a concept proposal

New proposals will appear under the 'Review proposals' tab.

The reviewer can:

- comment on individual concepts within a proposal
- accept an individual concept (for inclusion into the dictionary) - this asks the reviewer to link it to the newly created concept
- link a proposed concept within a proposal to an existing concept in the dictionary
- reject a concept within a proposal
- delete an entire proposal

Status

A proposal can be:

- Open / Submitted
- Closed
- Deleted (by reviewer)
- Does not exist in reviewer database (a bug)

Individual concepts within a proposal can be:

- Open
- New: <concept link>
- Existing: <concept link>
- Rejected

Submitting a proposal directly to another user (not recommended)

In the Settings tab, there's an option to enter the IP address of the target reviewer. By default this is set to XXXXXX. If you would like to submit your concept/s directly to another OpenMRS user, you will need to enter their IP address here.
