

Documentation Review Work Needed

We've researched and reached out to the community concerning their views. We've worked hard to understand the audience, their needs and how they will use our work. We proposed that the following are the potential persona's on of OpenMRS Documentation :

Our Proposed Process is as follows:

1. Identify a page that needs editing . If you are not sure about a certain piece of content , post your question on talk to get more clarity from the community. You can copy the talk thread under the comments heading associated with the page on this wiki page so that community can keep track of the conversation.
2. Post on the Wiki "[Documentation Work Needed](#)" page what you think the status of the page is (e.g. needs to be more detail, it needs to be deleted etc)
3. Edit the page with the content that you feel is relevant/important.
4. Post your completed page in the page statuses above with the link and comments where applicable
5. The Documentation team will review the edited page and request the Expert reviewer to review the page
6. Once the page has been reviewed by the domain experts the pages is pushed to a completed page category

Feel free to add any step you feel is left out. Thanks for your support we meet 4pm EAT and 1pm UTC in cyber space.

The conference is open to everyone with our contribution focusing on New developer's guide and user guide.

Documentation Review Process 2019

Reviewers: Thank you for your help! After selecting a page to review, please enter your name, review the changes and then enter "approved" or "needs work" into the status column(Including comments to direct any needed work.

Expert Review and Corrections

PAGE TITLE	PAGE LINK	CHANGES MADE	DESCRIPTION OF CHANGES	REVIEWER (S)	STATUS	Reviewer comments
For Open Web App Developers	For Open Web App Developers	View Changes	<ul style="list-style-type: none"> • Added a detailed bulleted list of the page under the Quick Overview section • Added a practicality, architecture, dependencies, and tools section to the What is an OWA part • Added an MVC architecture diagram • Added how to install and create an OWA to the How To Write An OWA section • Added a how to edit an existing OWA to the How To Write An OWA section • Added three examples to the Examples section Contributors: Maggie Harder Olivia RineSam Neupane Jacob Hansen	Suthagar Kailayapathy

Order Entry End User Guide for Lab Orders	Order Entry End User Guide for Lab Orders	View Changes	Added two new sections: Placing multiple lab orders and Discontinuing an active lab order. Also added additional detail to the Placing a lab order section. Contributors: Zachary Madsen Kevin Nguyen Logan Hellbusch youssef fathy	Nathan Ruhanga David DeSimone		
Using the Legacy UI	Using the Legacy UI	Created a landing page for the legacy UI	This page should be updated to have a short description of the information contained within its sub-pages, mention that it pertains only to the legacyui, and link to the page with corresponding instructions for the reference application. Contributors: Chase Pearson Ryan Le Tristan Attebery			
Using the Reference Application	Using the Reference Application	Created a landing page for the reference application	This page should be updated to have a short description of the information contained within its sub-pages, mention that it pertains only to the reference application, and link to the page with corresponding instructions for the legacyui. Contributors: Chase Pearson Ryan Le Tristan Attebery			
Person	Person	View Changes	This page has been populated to include information about the Person object, its properties, and information about the PersonService including code snippets and an explanation of the methods included in each. This page is modeled after the Patients page. Contributors: Colin Cummings Gage Zittler Matthew Sichterman	Matthew Ssemakadde Isaiah Rotimi Yemitan Jan Flowers		
User	User	View Changes	This page has been populated to include information about the User object, its properties, and information about the UserService including code snippets and an explanation of the methods included in each. This page is modeled after the Patients page. Contributors: Colin Cummings Gage Zittler Matthew Sichterman	Matthew Ssemakadde Isaiah Rotimi Yemitan Jan Flowers		
Open Web App Development Workflow	Open Web App Development Workflow	View Changes	Adding missing information regarding AngularJS and React OWAs, with links to other useful resources. Chris Burbach Christian Berck Jacob Orellana	tendo kiiza Martyn Pascal Brandt		
Developer How-To Setup And Use Eclipse	How-To Setup and Use Eclipse	View Changes	List of Changes: <ul style="list-style-type: none">• Updated all the images to reflect the most common version of Eclipse• Updated instructions to be more clear• Added instructions to have more detail to setup• Removed "Useful Plugins" section• Added some more requirements at the beginning to reflect the need for OpenMRS core and the SDK. Contributors: Adam Gray Easton Joachimsen Conner Hallett	Daniel Kayiwa		
Module Config File	Config File	View Changes	My team added more information about configuration files as well as updated the progress being made on version 1.6. We are awaiting approval for our pull request, but we fixed the bug that was previously stated in the documentation and the talk thread. Contributors: Adrian Pilkington Jessica Wheeler Peyton Tanzillo Wyatt Chandler	Daniel Kayiwa		
Appointment Scheduling Module	Appointment Scheduling Module	View Changes	We cleaned up and reorganized the "Capabilities" section of the documentation. This section was previously named "Privileges". Along with this, we added screenshots to the previously empty "screenshots" section. We also added a brief instruction on how to add a new Appointment for first time users. Contributors include Anthony McIntosh Aayush Khatiwada TyReesh Boedhrum William Prewitt	Fawwaz Yusran Tobin Greensweig		
Unit Testing	Unit Testing	Create new unit testing page under "For Open Web App Developers"	We added a new unit testing page under "For Open Web Apps Developers". This page talks about unit testing React and Angular OWAs. Contributors: Phillip Nguyen Parker Segal Hassan Abdelsamad AL FAROOQ SALTI			

Appendix C: Troubleshooting	Troubleshooting Flow Chart (Developer Manual)	View Changes	We updated the visualization, rotating it and splitting it in two separate webs. Contributors Joe Carter Jack Rowen	Jessica Ruff Daniel Kayiwa	needs work	<p>I looked at the Troubleshooting Flow chart and had a hard time following your edits. I'm not a GitHub person!</p> <p>From the documentation, it looks like you rotated, but it's still showing vertical instead of horizontal. Please correct this.</p> <p>Also please include a section to define things like (IRC) and add notes, like the fact that you have to request permission to create a JIRA ticket. Also, I would include the email address of the implementor and developer mailing list.</p> <p>I would also include any links if possible to where the people are being referred (dev manual, OpenMRS calendar, etc.).</p>
