## What's New?

This version of the OpenMRS Platform is a maintenance release for OpenMRS Platform 2.0.6, which fixes several bugs. You will find that this release is actually not for the latest platform but was majorly done to make release of webservices.rest 2.23.0 module possible as to coin for release of RefApp 2.9. There aren't changes in the CIEL dictionary and database changes.

## Bug fixes.

## Who is this release meant for?

This Release is most importantly prepared to run on a Reference Application instance of openmrs, we hope to have the same platform in 2.2, however you can still obtain it as a legacy application by using the standalone.

## Community Input

Lots of thanks to all our great contributors that have made this release a success, including: [Mark Goodrich](#), [Daniel Kayiwa](#) and [Lana Honcharuk](#) among others.

## Download

Openmrs platform 2.0.7 is available for download [here](#).

## Bundled Modules

- REST Web Services v2.23.0
- OWA v1.10.0
- FHIR v1.15.0
