

Upgrading to Platform 2.0

Below are some key conditions that need to be satisfied before attempting an upgrade because they are guaranteed to halt the upgrade if they are not.

- Ensure that you are running Java 8
- If upgrading from 1.9, first go through the steps at <https://wiki.openmrs.org/x/OALpAw>
- If you plan to use the legacy user interface, put the [legacyui](#) module in your modules folder.
