

Release Notes 1.6.2

Release date: Nov 19th 2010

If you are installing from scratch you should use this version. If you are running 1.6.0 with no problems, it's fine to defer this upgrade. (The 1.6.1 database is compatible with v1.6.0, so rolling back your installation in the case of errors is trivial.)

Download

- [Download OpenMRS 1.6.2](#)

Core Modules

This release includes version 0.4 of the Logic module as a [core module](#). You may upgrade this module, but you may not remove it or downgrade it below that level.

Bundled Modules

These modules are [bundled](#) with the 1.6.2 openmrs.war. They will be started automatically and can be removed if they are not wanted.

- Data Entry Statistics 1.3
- [Form Entry](#) 4.5.4
- [HTML Form Entry](#) 1.7.0.1
- [Reporting Compatibility](#) 1.5.2.1
- [Serialization.Xstream](#) 0.2.2 (this is needed for 'implementation id' to work properly)
