

# 2016-03-03 Developers Forum

## How to Join

### By Browser

- <https://www.uberconference.com/openmrs>

### By telephone

- US telephone number: **+1 201.479.2627**

## Agenda

- Quickly review previous meeting minutes (5 min)
- Word cloud of notes, Vaccination Module, Migration to 2.0 and supporting 1.x
- Review next meeting agenda

## Minutes

### OpenMRS Developers Forum 2016-03-03

#### Recording:

#### Attendees:

- Jamie Thomas
- Pralay Ramteke
- Serghei Luchianov
- Burke Mamlin
- James deGraft-Johnson
- Darius Jazayeri
- Daniel Kayiwa
- Badeia Jawhari
- Ulrich Tchuenkam
- Wyclif Luymia
- Ryan Eshleman
- Vishnu Rao
- Ada Yeung
- Kevin Nicoll
- Shreyans Sheth
- Mark Goodrich
- Mike Seaton
- Barry Levine

#### Agenda/Minutes:

##### Vaccination Module w/ Serghei Luchianov

- Screencast presentation
- Next steps
  - Faster addition of manufacturers
  - Reporting capability

- suggest that Serghei create wiki page for the vaccination module and post to [modules.openmrs.org](https://modules.openmrs.org)

Word cloud of notes w/ Barry Levine and Ryan Eshleman

- Screencast presentation
- Questions
  - It appears to handle misspellings – e.g., "insufficiency" (sic) – is that by design?
    - A benefit of not relying entirely on the Concept Dictionary for string matching and having the additional machine learning step is that it can find information that is misspelled as well.
  - Have you done anything to handle negation (e.g. "rule out")?
    - Not yet
  - I noticed some key concept at the end of the sentence it has an extra space before putting the period (.). Is it by design?
    - Just happened to be the case with the examples. It will work without this.

Migration to 2.0 and supporting 1.x w/ Rafal Korytkowski, Mark Goodrich, Mike Seaton <<https://wiki.openmrs.org/x/uoMgBQ>>

- TODO - will need to reschedule this topic and make sure Rafal can lead the discussion

If time permits, discuss revamping / re-implementing the Patient Flags module on recent OpenMRS versions. Currently, the Patient Flags module is compatible only with 1.6.x which is not supported anymore w/ Shreyans Sheth, Mark Goodrich  
"Build it against a newer version of OpenMRS" means:

\* check out the code

\* change this line: <https://github.com/openmrs/openmrs-module-patientflags/blob/master/pom.xml#L58> from "1.6.5" to "1.9.(something)"

\* mvn clean install

## Transcripts

- Audio recording of the call: Listen online or download (available after the meeting)
