

New Project Template

Use the "Tools" menu to copy and then modify this page.

Move the copied page into the Unassigned Projects section

Primary mentor	N /A
Backup mentor	N /A
Assigned to	N /A

Background

A paragraph explaining the "why" behind the project.

Abstract

Short description of the project.

Project Champions

- Person X
- Person Y
- Implementation Z

Objectives

1. These are outcomes of the project
2. List them out here in brief words
3. They should be measurable
4. They should be completable within the timeframe

Examples

If possible, describe some real world example use cases.

Design

This is where brainstorming will happen. Give a first-pass of what the design should be (table design, UI mockups, workflows). As work is happening, the mentor and student can use this space to add/remove/modify the design of the project.

Documentation

The student should write documentation as part of the project. Add an outline of what you would like to see in the wiki pages.

The docs written here are for convenience and should be moved to their own page(s) near the completion of the project.

Resources

- This is usually
- a bulleted list of
- other references
- and helpful docs
