

Release Notes 1.4.6

OpenMRS 1.4.6 is a maintenance/bug fix release over OpenMRS 1.4.5.

- Release date: Jan 20 2010
- Be sure to run the update-to-latest.sql file on your database
- If updating from a version less than or equal to 1.4.1, **it is recommended that you re-run the "Update Concept Words"**. See link on the Administration screen.
- [FormEntry Module](#) 3.6.8 is included in the openmrs war file
- [Download OpenMRS 1.4.6](#)

Bug fixes included in this release

#1908	Changed default message when patient identifier validation fails
#1920	Full support for modules with a dot in their module id
11075	Fixed a NPE in ConceptListItem when you have a database with incorrectly-set-up concept name taggings

More detailed information can be found by looking at the [tickets closed](#) for all releases in the 1.4 line.
