

User Guide

The OpenMRS community is working hard to assemble a complete User Guide for OpenMRS, including everything you need to know to install, configure, and use OpenMRS in your environment. We encourage everyone involved with the project to help refine and add to this documentation!

The [OpenMRS Guide](#) is available online and can be downloaded as a [PDF](#). The [PDF of the OpenMRS Guide \(6.35MB\)](#) is attached to this page as well.

The [Implementers Guide](#) describes everything from product evaluation to launching your site. This includes evaluating whether OpenMRS meets your needs, organizational and technical requirements, installation, and designing concepts and forms.

The [Administrator Guide](#) documents day to day tasks after launch. These include systems administration, adding new users, and maintaining forms and concepts.

The [User Guide](#) is for clinicians, data clerks, and other end users. It describes everyday tasks like logging in and finding a patient record.
