Current Progress

We now use Trello for our virtual story wall. You can find us via the [Trello OpenMRS Melb](#) community.

Our story wall is listed under "Boards". It is open to the public to view without a log in.

However to update and contribute you will need to create a free Trello account. You can contact the board Admin during our hack nights to get added.

Tickets/stories for main OpenMRS core development is hosted - <https://tickets.openmrs.org/secure/Dashboard.jspa>

Code Location

Source code for the Concept Proposal Module is hosted on github here:

<https://github.com/OpenMRS-Australia/openmrs-cpm>

Visit the page for instructions on getting it working.

CI and Environments

Error rendering macro 'excerpt-include'

No link could be created for 'projects:Go Pipeline Servers'.
