

Table.Field	Data
concept.class_id	Represented by concept_class 'Diagnosis' with concept_class_id = 4
concept.datatype_id	Represented by concept_datatype 'N/A' with concept_datatype_id = 4
concept_name.name	Leprosy where locale is 'en'
concept_name.concept_name_type	FULLY_SPECIFIED for Leprosy; NULL for Hansen's disease and Hansenosis
concept_name.locale_preferred	'1' for Leprosy, but '0' for Hansen's disease and Hansenosis
concept_name.name	Lèpre where locale is 'fr'
concept_answer.concept_id	The concept_id represents the question (<i>Outpatient Diagnosis</i>)
concept_answer.answer_concept	The concept_id for Leprosy (59), which is an answer to the question (<i>Outpatient Diagnosis</i>)
concept_description.description	The description text for each locale
concept_reference_source.name	ICD-10-WHO (concept_source_id = 3), PIH (concept_source_id = 5)
concept_map_type.name	SAME-AS (concept_map_type_id = 1), NARROWER-THAN (concept_map_type_id = 2)
concept_reference_term.code	A30.9 where concept_source_id = 3 (ICD-10-WHO)
concept_reference_map.concept_map_id	Magical glue which connects concept_id (ie. 59), concept_map_type (ie. NARROWER-THAN), concept_reference_term (ie. ICD-10-WHO A30.9)
concept_word.word	Leprosy, Hansen's, disease, Hansenosis, Lèpre are all individual rows in this table
