

How-To Setup And Use Your IDE

We have put together some pages to help you setup different IDEs for OpenMRS development. These pages also contain some tips and tricks that might improve your development experience.

 Please help us provide an easy entry for new developers!

If you

- do not find the IDE of your choice please feel free and add another page as a child of this one and link it in the bullets below
- find that some information is outdated please adapt it
- know an awesome plugin, setting, trick you want to share with us please add it. We love to learn 😊

Guides:

1. [Eclipse](#)
2. [IntelliJ](#)
3. [Netbeans](#)
