

Technology Radar Process

Writing the Radar

The OpenMRS Technology radar is drawn from a Google Sheet (om.rs/radardata) and published using a fork of Thoughtwork's Radar tool ([openmrs/openmrs-contrib-radar](https://openmrs.org/openmrs-contrib-radar)).

After Each Radar Release

Create a Talk thread with the [tech-radar](#) tag announcing the release. It should point to this page, and ask for feedback.

Update the links to that Talk thread in these places:

- <https://github.com/openmrs/openmrs-contrib-radar/blob/master/index.html> (search for "Have feedback for us?")
- on the parent wiki page to this, in the panel on the top
