In May 2014, with the initial releases of OpenMRS Platform 1.10, versioning of the OpenMRS Platform was separated from the reference application in order to allow these to grow independently. The OpenMRS Platform provides the engine on which OpenMRS runs. In some circumstances, people may be interested in using the platform alone, independently of the reference application; these releases are provided for them.
- Platform Release Notes 1.11.6
- Platform Release Notes 1.11.5
- Platform Release Notes 1.11.4
